

Streamflow Data Analysis Reflection

1. List at least two things that you found interesting from the video footage of the 1964 floods.

2. What does the abbreviation cfs stand for? What does it mean in relation to streamflow?

3. Which year(s) did you and your group graph?

4. What pattern(s) did you and your group notice in your graphs?

5. What pattern(s) did you notice in the 40 year graph (once all the graphs were combined)?

6. What stream and weather variables contribute to create a flood year? A drought year?

7. What impacts can the climate have on streamflow and watersheds?
